

DON'T JUST GET SKILLED APPRENTICES GET SPECIFICALLY SKILLED APPRENTICES

Apprentices with trade-specific skills give you a huge advantage. And ConstructionSkills can help you get these skills in place to meet the demands of the procurement people who award contracts. They're looking for proof that you're ready and waiting with the right training plans, people and abilities – with skills like those listed in the green panel below. Even in these tough times, there are contracts to be won (particularly in the public sector). Make sure you have the trade-specific skills needed.

Built Environment Technician Apprentices offer many benefits. Some are specific and some, like the ones listed below, come with every apprentice from ConstructionSkills.

- Apprentices work towards the qualifications that industry people want to see
- Apprentices mix on-the-job training with off-site training and college attendance while developing knowledge to help build the skills for the future
- ConstructionSkills is the leading provider of apprentices within the industry offering applicants across the widest range of trades – including your trade
- Your apprentice gains the highest quality of training to industry recognised standards
- Gain a qualified workforce to meet future demands
- ConstructionSkills can provide you with a structured programme of training

NC in The Built Environment and SVQ Level 3 in Technical Design Built Environment

Your apprentice will receive relevant training to help them achieve their NC in the Built Environment and SVQ Level 3 in Technical Design Built Environment:

- 3 year apprenticeship
- Attendance at Inverness College includes block release – other colleges may be day release or block release
- The SVQ is portfolio based and evidence is collected on site

The course will include:

- Building design technology
- Health and safety
- Computer Aided Drawing in construction
- Building services in domestic low rise buildings
- Construction materials
- Sustainability in the building industry
- Mechanics for construction
- Modern methods for construction
- Drawing for construction
- Civil engineering site work
- A building construction project

TALK TO US ABOUT THE BENEFITS LIKE GETTING A GRANT TOWARDS TRAINING EACH APPRENTICE

We pay for the training. You get the benefits.

Grants are available for training with each apprenticeship. So you gain the skills without having to fund the training.

Plenty of help with the paperwork.

Let one of our Apprenticeships Officers guide you through the process. Their help with the form filling makes the whole process easy.

Train your own team.

Start members of your current team on a trade-specific apprenticeship or recruit a new apprentice. ConstructionSkills can help you find the right person to meet your needs.

ConstructionSkills can do so much more.

In addition to helping with apprenticeships, our team can help your business improve its skills base in so many ways. Talk to our team for more help.

YOUR TRADE. YOUR BUSINESS. YOUR APPRENTICE. GET THE RIGHT SKILLS IN PLACE TODAY.

Secure your contract-winning apprentice now.

Fill in this form and fax back to us: **01463 230868**
