

Project: Project King, Macallan Distillery

On Site Exemplar Safety Behaviour from Careys

Comments:

1. Bespoke handrail systems deployed during off-loading from flat-bed vehicle significantly reducing the risk of falls from height.

Comments:

2. A device allowing the safe cleaning operation of a concrete 1m³ Concrete Hopper arrives on site prior to the operations commencing.

Comments:

3. A simple remote batching point is established complete with wash out sump, water supply and cement store with CoSHH information panels.

Comments:

4. A timber formwork ring is constructed, complete with extraction system, information panel, PPE storage, joiner's workbench, first aid kit and drinking water station.

Comments:

5. The effective use of a 360° excavator attachment makes this off-loading operation almost risk free. All RA/MS and SSoW agreed prior to task commencement.

Comments:

6. Absolute control of confined space operations is observed by all Careys personnel who are trained and fully versed on their safe system of work.

Comments:

7. The simple "colour coded" system of roles and responsibilities makes site life that much easier. Red-Fire Marshall. Green-First Aider. Orange-Plant Operator. Blue-Supervisor

Comments:

8. Satellite joiner's work stations complete with all the necessary tools, equipment and safety features to operate in a 21st century manner.

Comments:

9. On site Carey Safety Shacks are an excellent example of workforce engagement, used primarily to update the operatives on all corporate and legal compliance. Designed and maintained by site staff.

Comments:

10. The entire site footprint is effectively segregated with a network of well signposted walkways, making traversing the Project safe and easy.

Comments:

11. An electronic sign in / out system ensures that all Carey personnel can be accounted for at any given time during working hours.

Comments:

12. Fully equipped and self-sufficient sub offices are placed strategically on site initially to prevent unnecessary pedestrian traffic on a very busy site.
